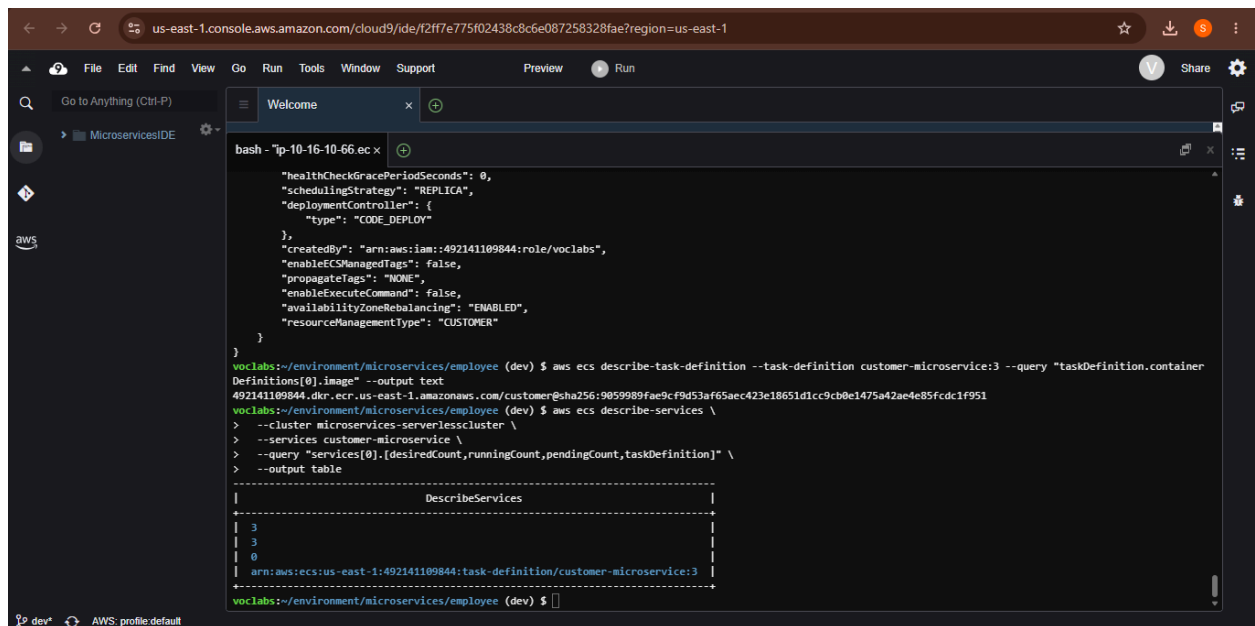

Figure 15: Amazon ECS – Running Microservice Tasks

The screenshot displays the Amazon Elastic Container Service (ECS) console interface. The top navigation bar includes the AWS logo, a search bar, and account information for 'United States (N. Virginia)' and 'Account ID: 4921-4110-9844'. The breadcrumb trail shows the path: Amazon Elastic Container Service > Clusters > microservices-serverlesscluster > Tasks.

The left sidebar contains the 'Amazon Elastic Container Service' menu with options like 'Favorites and recents', 'Express Mode', 'Clusters', 'Namespaces', 'Task definitions', 'Daemon task definitions', and 'Account settings'. It also includes links to 'AWS Resource Explorer', 'AWS Batch', 'Amazon ECR', and 'Repositories'.

The main content area is titled 'Tasks (15)' and shows a list of running tasks. The tasks are filtered by 'Any desired status' and 'Any launch type'. The table below lists the tasks:

Task	Last status	Desired status	Task definition	Health status
1c1d18ef657a41dba...	Running	Running	customer-microservice:3	Unknown
3c21cb3262834e989...	Running	Running	employee-microservice:6	Unknown
4b3a2c73fb774aa2b...	Running	Running	customer-microservice:3	Unknown
ab2dafb9911c4d2fb...	Running	Running	customer-microservice:3	Unknown

Below the task list, there is a 'Task details' section. The bottom of the console shows the footer with 'CloudShell', 'Agent Toolkit for AWS', 'Feedback', and copyright information for Amazon Web Services, Inc. or its affiliates.
